

RideKC  STREETCAR™

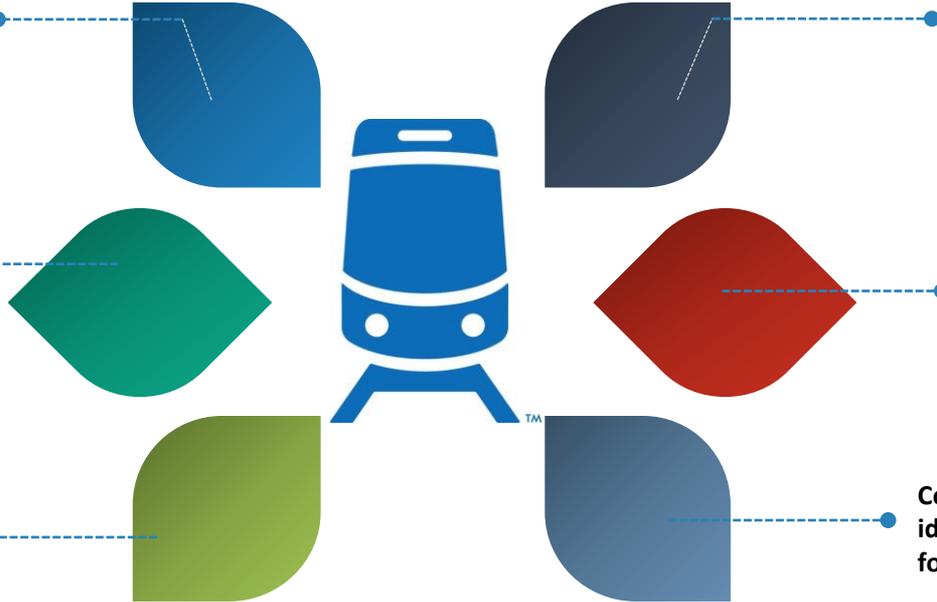

While schedule negotiations with CAF continue,  
KCMO has made significant progress on expediting delivery of the streetcar vehicles.  
The delivery schedule is contingent upon a successful testing phase.

## What Can CAF Do

Add a second production shift to address critical choke points in the manufacturing process

Place a dedicated manufacturing engineer on the shop floor in order to quickly address any issues that occur.

Work with the City of Kansas City through the remainder of the testing process to identify and resolve any issues that may impact the delivery date

## What Can We Do

Negotiations led to an estimated savings of 4 weeks on our delivery schedule

City staff will conduct weekly meetings to monitor progress and implementation of factory process improvements

Continue to work with CAF to identify additional opportunities for improvement

RideKC  STREETCAR™

{ THANK YOU }
